

Failure: No transcoding with Twonkymedia-Server under Ubuntu

```
# install ffmpeg for video and audio transcoding
# and imagemagick for picture transcoding
sudo apt-get install ffmpeg
  imagemagick
#####
# say twonky that we haven't any windows system #
#### FFMPEG to convert videos
sudo vim /usr/local/twonkymedia/cgi-bin/
ffmpeg.location# change
# c:/ffmpeg to /usr/bin
# quit with :wq
#### CONVERT with imagemagick
sudo vim /usr/local/twonkymedia/cgi-bin/
convert.location# change
# %PROGRAMFILES%\ImageMagick to /usr/bin
# quit with :wq
#### ANY2MP3 to convert to mp3
#### see any2mp3-Script below
sudo vim /usr/local/twonkymedia/cgi-bin/
any2mp3.location# insert
# /usr/bin
# quit with :wq
# now we have to restart twonkyserver
# on commandline
sudo /etc/init.d/
twonkserver restart# OR
# on webinterface http://<yourtwonkyserver>:9000
#check the webinterface http://<twonkyhost>:9000 and activate transcoding
```
