

```
import java.util.Timer;
import java.util.TimerTask;
public class TimerApp {
    private Timer timer;
    //Konstruktor
    public TimerApp(){
        timer = new Timer();
        timer.scheduleAtFixedRate(new TimerTask() {
            @Override      public void run() {
                //Code ....
            }
        }, 1000, 1000);
    }
}
```
